PClub Summer Of Code

About PSoC

Pclub Summer of Code is a two-month long open source programme conducted by Pclub UIET during the summers. PSoC has completed two years of educating young minds through robust initiatives. We want to be a tech community where students can polish and grow their technical skills, as well as a place where beginners can get started with open source development while encouraging diversity. Over the course of these months, participants make consistent contributions to a variety of projects under the close supervision of skilled mentors. As a result of this exposure, students begin to contribute to real-world projects from the comfort of their own homes.
We intend PSoC for both those interested in open source development and those who are already involved in FOSS development.

How does it work?

Mentors-

Mentors may apply to have their projects featured. The one we chose would choose contributors for their project from a pool of proposals. Mentors would also advise mentees on project completion, needed stack resources, GitHub and PRs, and so on. Contributors are free to contact mentors regarding any query.

Contributors-

Contributors must look through all the projects to find the one that is best suited to them or that piques their interest. Then they must write a proposal outlining how they intend to complete the project. The mentor will either accept or reject you based on your proposal. We would also include some basic projects to help newcomers get started with open source development while encouraging diversity.

FAQs

1. **Is there any registration fee?**

   No, there are no registration fees for participation. It is absolutely free of cost.

2. **How would contributors contact mentors ?**

   We would provide the mail id and GitHub of mentors to selected mentees.

3. **What are the criteria for selection as a mentee?**

   Mentees will be selected on the basis of the submitted proposals.

4. **Who all can participate?**

   Any college student can apply, as it is open to all.

About PClub

Pclub is a community that is passionate about coding, web development, and other aspects of programming.

Pclub was founded in 2017, and since then it has held sessions, webinars, and group discussions to share information and build a strong network. It is reaching new heights with each passing year.

Pclub organises various activities and open source projects such as software freedom day, hacktober fest, PSoC, HackUiet, and AIsaturdays, which encourages many students to contribute and gain knowledge.
